

# Master Measuring Capacity and Volume in Litres

## Fluency 1

**Look at the bucket. Complete the stem sentence.**

The capacity of the bucket is \_\_\_\_L.

## Fluency 2

**Look at the bucket. Complete the stem sentence.**

The capacity of the bucket is \_\_\_\_L.

## Fluency 3

**Look at the bucket. Complete the stem sentence.**

An estimation for the capacity of the bucket is \_\_\_\_L.

## Fluency 4

**Look at the bucket. Complete the stem sentence.**

An estimation for the capacity of the bucket is \_\_\_\_L.

## Fluency 5

**Look at the weed killer. Complete the stem sentence.**

The volume of the weed killer is exactly \_\_\_\_L.

## Fluency 6

**Look at the potting soil. Complete the stem sentence.**

The volume of the potting soil is exactly \_\_\_\_L.

## Fluency 7

**Look at the plant food. Complete the stem sentence.**

The volume of the plant food is \_\_\_\_L to the nearest litre.

## Fluency 8

**Look at the patio cleaner. Complete the stem sentence.**

The volume of the patio cleaner is \_\_\_\_L to the nearest litre.

## Fluency 9

**The volume of the aquatic compost in container A is 1L.**

**Estimate the volume in container B.**

An estimation for the volume of the aquatic compost is \_\_\_\_L.

## Fluency 10

**The volume of the lawn feeder in container A is 1L. Estimate the volume in container B.**

An estimation for the volume of the lawn feeder is \_\_\_\_L.
