

Master Comparing Fractions Greater Than 1

Fluency 1a

Use the number lines to identify the fractions and complete the stem sentences.

Fluency 1b

Use the number lines to identify the fractions and complete the stem sentences.

Master Comparing Fractions Greater Than 1

Fluency 1c

Use the number lines to identify the fractions and complete the stem sentences.

Fluency 2a

Use the number lines to identify the fractions and complete the stem sentences.

Master Comparing Fractions Greater Than 1

Fluency 2b

Use the number lines to identify the fractions and complete the stem sentences.

Fluency 2c

Use the number lines to identify the fractions and complete the stem sentences.

Master Comparing Fractions Greater Than 1

Fluency 3a

Use the number lines to compare the fractions and complete the comparison statements.

$$\frac{5}{3} \bigcirc \frac{13}{9}$$

$$\frac{32}{10} \bigcirc \frac{165}{50}$$

Fluency 3b

Use the number lines to identify the fractions and complete the stem sentences.

$$7\frac{1}{5} \bigcirc 7\frac{20}{25}$$

$$9\frac{6}{7} \bigcirc 9\frac{14}{21}$$

Master Comparing Fractions Greater Than 1

Fluency 3c

Use the number lines to compare the fractions and complete the comparison statements.

$$2\frac{5}{6} \bigcirc \frac{68}{24}$$

$$\frac{35}{8} \bigcirc 4\frac{18}{32}$$

Fluency 4a

Convert to a common denominator to compare these fractions.

$$\frac{14}{9} \bigcirc \frac{47}{27} = \frac{\quad}{27} \bigcirc \frac{47}{27}$$

$$\frac{57}{22} \bigcirc \frac{26}{11} = \frac{57}{22} \bigcirc \frac{\quad}{22}$$

Fluency 4b

Convert to a common denominator to compare these fractions.

$$7\frac{35}{60} \bigcirc 7\frac{7}{12} = 7\frac{35}{60} \bigcirc 7\frac{\quad}{60}$$

$$9\frac{1}{3} \bigcirc 9\frac{9}{15} = 9\frac{\quad}{15} \bigcirc 9\frac{9}{15}$$

Reasoning, answers and teaching slides are available with a subscription.

Fluency

Master Comparing Fractions Greater Than 1

Fluency 4c

Convert to a mixed number or improper fraction then a common denominator to compare these fractions.

$$\frac{27}{4} \bigcirc 6 \frac{11}{16} = \frac{\quad}{4} \bigcirc 6 \frac{11}{16} = \frac{\quad}{16} \bigcirc 6 \frac{11}{16}$$

$$2 \frac{4}{24} \bigcirc \frac{18}{8} = \frac{\quad}{24} \bigcirc \frac{18}{8} = \frac{\quad}{8} \bigcirc \frac{18}{8}$$

Fluency 5c

Convert to a mixed number or improper fraction then a common denominator to compare these fractions.

$$\frac{47}{10} \bigcirc 4 \frac{33}{40} = \frac{\quad}{\quad} \bigcirc \frac{\quad}{\quad} = \frac{\quad}{\quad} \bigcirc \frac{\quad}{\quad}$$

$$1 \frac{8}{11} \bigcirc \frac{84}{55} = \frac{\quad}{\quad} \bigcirc \frac{\quad}{\quad} = \frac{\quad}{\quad} \bigcirc \frac{\quad}{\quad}$$

Fluency 5a

Convert to a common denominator to compare these fractions.

$$\frac{16}{6} \bigcirc \frac{77}{30} = \frac{\quad}{\quad} \bigcirc \frac{\quad}{\quad}$$

$$\frac{32}{28} \bigcirc \frac{8}{7} = \frac{\quad}{\quad} \bigcirc \frac{\quad}{\quad}$$

Fluency 5b

Convert to a common denominator to compare these fractions.

$$8 \frac{2}{9} \bigcirc 8 \frac{11}{36} = \frac{\quad}{\quad} \bigcirc \frac{\quad}{\quad}$$

$$5 \frac{11}{12} \bigcirc 5 \frac{41}{48} = \frac{\quad}{\quad} \bigcirc \frac{\quad}{\quad}$$
